# On-Net Surveillance Systems
Network Based Digital Video Surveillance

# The Power of Virtual Matrix

**High resolution digital quality images**

**Controlling large monitor banks in one click of a mouse**

**Ability to control remote monitors and force video stream to be displayed**

**Easy integration with centralized access control systems**

**Eliminates the need for multiple ports video matrix**

**Eliminates the need of coax cabling**

**Ideal for multiple control rooms and multilevel monitoring situations.**

# NetMatrix - Instant Control of CCTV Images

NetMatrix, a software add-on for NetDVR, enables CCTV system operators to display live video from any **surveillance camera to any display monitor**, without the need for hardware video matrix switches.

## Spot Monitors Can Be Anywhere

Regardless of whether the spot monitors are in your local control room or across the country, NetMatrix can direct CCTV camera streams to a display monitor with just the click of a mouse.

NetMatrix is controlled from within NetDVR (the network based digital video recorder) or through web links. Its functions include:

**One-touch switching of multiple cameras to multiple display screens;**

**Activation via graphical premises maps;**

**Redirection of video streams to monitors when triggered by alarm (motion detection, door contact etc.)** and much more.

## Unleash The Power Of The Network

The new generation of network-based CCTV applications make it possible to access any number of cameras from any location. NetMatrix takes full advantage of this new technology - the time has never been better to replace complex matrix switches and coax cabling with NetMatrix.
